PEOPLE

The value of a great team

At Faro Barcelona, sustainability starts from the inside, taking care of the well-being and personal growth of our team.

Equality and diversity

At Faro Barcelona all people are great and equal, whatever their gender, age, religion or sexual orientation. Women, as well as men, play an important role: 76% of our team and 49% of our leaders are women.

Community support

For over a decade, we have been collaborating in social projects of foundations such as Caritas or Royal Mc Donalds, providing our help to ensure a better quality of life for the people helped by these organisations. Since 2008, we have had our own social project with Hook; for every light sold, we feed a child in Africa. We have managed to help 471 children.

Supporting new talent

We collaborate with universities and design schools to help new talents emerge into their professional development. Projects such as Reborn, a second life for waste (La Llotja), Design Make It with 3D printing (CIM UPC), are some of the collaborations we have carried out.

Social innovation

We take part in disruptive social innovation research and develop products and services that solve social problems such as the ageing of the population. We have a positive impact on people's quality of life, contributing to their well-being and comfort through quality, accessible and sustainable lighting and design.

El valor de un gran equipo humano

En Faro Barcelona la sostenibilidad empieza en el interior, cuidando el bienestar y crecimiento personal de nuestro equipo.

Igualdad y diversidad

En Faro Barcelona todas las personas son grandes e iguales, sean del género, edad, religión u orientación sexual que sean. La mujer, igual que el hombre, desempeña un papel importante: el 76% de nuestro equipo y el 49% de nuestros líderes son mujeres.

Apoyo a la comunidad

Llevamos más de una década colaborando en proyectos sociales de fundaciones como Cáritas o Royal Mc Donalds aportando nuestra ayuda para garantizar una mejor calidad de vida de las personas que ayudan estas organizaciones. Desde 2008, tenemos nuestro propio proyecto social con Hook, por cada luminaria vendida alimentamos a un niño en África. Hemos logrado ayudar a 471 niños.

Apoyo a los nuevos talentos

Colaboramos con universidades y centros de diseño para ayudar a los nuevos talentos en su desarrollo profesional. Proyectos como Reborn, una segunda vida para los desechos (La Llotja), Diseño Make It con impresión 3D (CIM UPC), son algunas de las colaboraciones que hemos realizado.

Innovación social

Participamos en investigaciones de innovación social disruptiva y desarrollamos productos y servicios que resuelven problemáticas sociales como el envejecimiento de la población. Impactamos positivamente en la calidad de vida de las personas, contribuyendo a su bienestar y confort a través de la iluminación y el diseño de calidad, accesible y sostenible.

PLANET

Sustainable packaging

At Faro Barcelona, we have a sustainable packaging decalogue. Our packaging is made of recycled cardboard boxes printed in one ink and without staples to ease the disassembly and the right recycling. We have eliminated single-use plastics and replaced them with recyclable paper bags and we use recycled cardboard shavings to protect the product during transport in 60% of our shipments. All our packaging meets Drop Test ISTA-2C quality standards to ensure products arrive in perfect condition.

More sustainable logistics and transport

We have optimised the packaging size of each product to reduce the amount of packaging material and the carbon footprint of transport. FMCG products are transported in stacks, which means a greatly reduced carbon footprint. We have opened a new logistics centre in China to supply our Asia-Oceania market in a more sustainable way and reduce carbon emissions from transport.

Sustainable workspaces

We use green electricity in our offices. We produce 70% of the energy we consume with our own photovoltaic installation, ensuring that the energy is from renewable sources. In addition, our headquarters are designed to maximise the use of solar energy and natural light.

Supporting new talent Team committed to sustainability

At Faro Barcelona we have an internal sustainability committee that promotes different sustainability actions and monitors them.

Embalaje sostenible

En Faro Barcelona disponemos del decálogo de embalaje sostenible. Nuestros embalajes son cajas de cartón reciclado impresas a una sola tinta y sin grapas para facilitar así el desmontaje y su correcto reciclaje. Hemos eliminado los plásticos de un solo uso y sustituido por bolsas de papel reciclable y utilizamos virutas de cartón reciclado para la protección del producto durante el transporte en el 60% de nuestros envíos. Todos nuestros embalajes cumplen los estándares de calidad de Drop Test ISTA-2C para asegurar que los productos lleguen en perfecto estado.

Logística y transporte más sostenible

Hemos optimizado el tamaño del embalaje de cada producto para reducir la cantidad de material de embalaje y la emisión de carbono derivado del transporte. Los productos de gran consumo se transportan apilados, lo que implica una gran reducción de huella de carbono. Hemos abierto un nuevo centro logístico en China para abastecer a nuestro mercado Asia-Oceania de una forma más sostenible y reduciendo las emisiones de carbono derivadas del transporte.

Espacios de trabajo sostenibles

En nuestras oficinas utilizamos energía eléctrica verde. Producimos un 70% de la energía que consumimos con nuestra propia instalación fotovoltaica, asegurando que la energía es de fuente renovable. Además, nuestra sede cuenta con un diseño pensado para el máximo aprovechamiento de la energía solar y la luz natural.

Equipo comprometido con la sostenibilidad

En Faro Barcelona contamos con un comité de sostenibilidad interno que promueve diferentes acciones de sostenibilidad y realiza su seguimiento.

PRODUCT

Sustainability from conceptualisation

In our eco-design decalogue we set out the main guidelines we follow to make our designs more sustainable. We work with external consultants to reduce the environmental impact of our production processes, guaranteeing the quality and safety of our products. We are training our design team in circular design techniques for the more sustainable development of all our products.

A longer useful life

We work to design timeless, repairable and long-lasting products in order to reduce their environmental impact. We research new methods to ensure that our designs last longer, are easier to repair and recycle.

Standardisation and

modularity

We work on the standardisation of components for a more efficient use of resources and more sustainable production. We develop modular collections that allow us greater versatility and more efficient logistics and transport.

More sustainable processes and materials

One of the major challenges towards a more sustainable production is the choice of materials as it represents more than 70% of the product's carbon footprint. The use of recycled materials or materials with a lower environmental impact, the implementation of new techniques and the reduction of the number of materials used, help us to achieve more sustainable manufacturing. Control of the supply chain

We share our sustainability vision and commitments

with all our suppliers. We, therefore have a supplier code of conduct to ensure a more sustainable supply chain.

Sostenibilidad desde la conceptualización

En nuestro decálogo de eco-diseño recogemos las principales directrices que seguimos para que nuestros diseños sean más sostenibles. Trabajamos con asesorías externas para reducir el impacto ambiental de nuestros procesos productivos, garantizando la calidad y seguridad de nuestros productos. Estamos formando a nuestro equipo de diseño en técnicas de diseño circular para el desarrollo más sostenible de todos nuestros productos.

Una mayor vida útil

Trabajamos en el diseño de productos atemporales, reparables y duraderos con el fin de reducir su impacto medioambiental. Investigamos nuevos métodos para garantizar que nuestros diseños sean más duraderos, fáciles de reparar y de reciclar.

Estandarización y modularidad

Trabajamos en la estandarización de componentes para un uso más eficiente de los recursos y una producción más sostenible. Desarrollamos colecciones modulares que nos permiten mayor versatilidad y una logística y transporte más eficientes.

Procesos y materiales más sostenibles

Uno de los grandes retos hacia una producción más sostenible es la elección de los materiales ya que representa más del 70% de la huella de carbono del producto. El uso de materiales reciclados o con menor impacto ambiental, la implementación de nuevas técnicas y la reducción del número de materiales usados, nos ayuda a conseguir una fabricación más sostenible.

Control de la cadena de suministro

Compartimos nuestra visión y compromisos de sostenibilidad con todos nuestros proveedores. Por ello, disponemos del código de conducta de proveedores para garantizar una cadena de suministro más sostenible.

Light has a direct impact on our physical and emotional state.
Our products and solutions are developed with the non-visual effects of light
in mind, for the benefit of people's health and well-being.

LUZ INTEGRADORA

INTEGRATIVE LIGHTING

La luz tiene un efecto directo en nuestro estado físico y emocional.
Nuestros productos y soluciones son desarrollados teniendo en cuenta los
efectos no visuales de la luz, en beneficio de la salud y el bienestar de las
personas.

We develop products with the awareness that lighting is a key element in our lives and plays a fundamental role in our well-being. We apply the concept of Human Centric Lighting (HCL) in our solutions, enhancing the effects that light has on people and reproducing the rhythms of natural light in artificial lighting. Our circadian cycle can be reproduced with artificial and dynamic lighting that corresponds to the movement, intensity and colour of sunlight.

CIRCADIAN RHYTHMS

Desarrollamos productos teniendo muy presente que la iluminación es un elemento clave en nuestras vidas y juega un papel fundamental en nuestro bienestar. Aplicamos el concepto de Human Centric Lighting (HCL) en nuestras soluciones, mejorando los efectos que la luz tiene en las personas y reproduciendo los ritmos de la luz natural en la iluminación artificial. Nuestro ciclo circadiano se puede replicar con una iluminación artificial y dinámica coincidiendo con el movimiento, la intensidad y el color de la luz solar.

PHOTOBIOLOGICAL RISK

We develop our luminaires by selecting the highest quality light sources and working the optical compartments in order to be able to offer RG0 products, free of photobiological risk.

The European standard for photobiological safety EN 62471 establishes a method for assessing the risk of eye or skin damage from a lamp or luminaire.

RIESGO FOTBIOLÓGICO

Desarrollamos nuestras luminarias seleccionando fuentes de luz de la máxima calidad y trabajando los bloques ópticos para poder ofrecer productos RG0, exentos de riesgo fotobiológico.

La norma europea de seguridad fotobiológica EN 62471 establece un método para evaluar el riesgo de daño ocular o dermatológico de una lámpara o luminaria.

FLICKER FREE

Flicker is a visible and repetitive change in light intensity caused mostly by voltage fluctuations. At Faro Barcelona we select our drivers with the guarantee of leading European brands, ensuring a good regulation and adjustment of the electricity flow, without temperature changes altering its operation.

En Faro Barcelona seleccionamos nuestros drivers con la garantía de primeras marcas europeas, asegurando una buena regulación y ajuste del flujo de electricidad, sin que los cambios de temperatura alteren su funcionamiento.

Noise in offices and workplaces has direct consequences on worker performance. The most immediate one is the reduction of their concentration. Workers exposed to continuous noise in their workplace are less effective in their work tasks. Concentration often means giving the brain a break to think better and focus on an activity. Luminaires made from fabrics with noise-absorbing properties are perfect for work spaces with high noise levels and acoustic distractions.

Today's technology makes it possible to integrate thousands of luminaires and control functions into a single system based on a DALI control network or even centralise it in a BMS system. At FARO we have concentrated all our experience and knowledge on simple solutions helping to find the necessary control elements to customize an installation.

Despite the complexity and size of the lighting installations, only a few components are needed to manage the entire system: Luminaires with DALI driver, DALI sensors (multisensors), DALI pushbuttons, DALI buttons, DALI Bus feeder and routers as a control unit.

La tecnología actual permite integrar miles de luminarias y funciones de control en un solo sistema basado en una red DALI de control o incluso centralizarlo en un sistema BMS. En FARO hemos concentrado toda nuestra experiencia y conocimientos en soluciones simples ayudando a encontrar los elementos de control necesarios para personalizar una instalación.

A pesar de la complejidad y el tamaño de las instalaciones de iluminación, solo se necesitan algunos componentes para gestionar todo el sistema: Luminarias con driver DALI, sensores (multisensores) DALI, pulsadores DALI, botoneras DALI, alimentador de Bus DALI y routers como unidad de control.

DALI and DALI-2 are open lighting standards. It is a digital protocol used worldwide to control lighting components, it allows to transfer information such as lighting commands, fault data, consumption and diagnostics between different devices.

SMART LIGHTING

DALI y DALI-2 son estándares abiertos de iluminación. Es un protocolo digital usado en todo el mundo para controlar componentes de iluminación, permite transferir información como los comandos de iluminación, los datos de fallos, consumos y los diagnósticos entre distintos dispositivos.
